

# Agility Desktop

## Flexible Working – at home, the office or on the go

### Ever wanted to be able to use your Office applications from anywhere with minimal fuss?

Agility Desktop offers a combination of technologies that let you take your desktop with you, wherever you go. Giving you access to all your applications (Word, Excel, Sage and so on) wherever you happen to be working.

Since Agility Desktop is so flexible, you can save time, increase productivity and get your job done without worrying about IT systems.

### What does it do for you?

- ✔ Flexible – perfect if you work from home
- ✔ Saves money – no need to buy expensive software like Microsoft Office
- ✔ Makes your life simpler – no servers or backup systems to buy or maintain
- ✔ Consistent – your preferences are always the same
- ✔ More secure – with data stored safely, backed up “just in case” something goes wrong
- ✔ You’ll always be working from the latest version
- ✔ Grows with you – adding new users is simple and fast, so the solution grows as your business does
- ✔ Simple charging – fixed monthly costs per person with no hidden extras

### What do customers say?

We wanted an affordable, scalable and secure solution for a new project – Agility Desktop ticked all the boxes and VPW seamlessly managed the migration from our existing systems.

One week after going live, the manager broke his leg and because we had Agility Desktop, he was able to carry on working from home, with full access to all his apps, files and email. His ability to continue working saved him having to take sick leave.

## So what can you do with Agility Desktop?

Agility Desktop is a perfect service for any small business that needs flexible desktop systems to run common software like *Microsoft Office* or *Quickbooks* accounts software. It is also useful if you want people to move between computers, or work flexibly – such as “on the road”...

### Key Features

- ✔ No servers needed
- ✔ Backups of data included
- ✔ Easy to expand/change
- ✔ Works with other services such as Agility Mail and Agility Voice

### Typical Software Products

- ✔ Microsoft Word, Excel, PowerPoint and Access
- ✔ Quickbooks Accounts
- ✔ MS Project Professional
- ✔ Sage Instant Accounts or Line 50

## More advanced uses for Agility Desktop...

Agility Desktop fits perfectly in environments which have lots of “shift” staff – such as Leisure Centres, Hotels, and Call Centres – but works just as well in a single small office for 2 – 3 people!

It’s also perfect if you have staff who work remotely – from home, a remote office or out on the road – no more does critical business data have to live on a laptop at risk!

For the most demanding needs, Agility Desktop can even support custom software – those specialist products you need in your industry. That’s how flexible Agility Desktop can be for you.

### How about trying the service?

We’re happy to provide a demo of the Agility Desktop service to you – either in-person or by providing you with a 30-day free trial of the service, so you can see for yourself just how useful it is for your business. There’s absolutely no obligation – just give it a whirl.

### How much does it cost?

The cost of the service depends on how many people you need to use it, what software you take with your subscription and any other things we can offer to meet your particular needs – but it starts from £20 a month, so it’s a cost-effective option too.
