

## Agility Mail – Hosted Email

### Powerful Email – at the office, on your mobile and wherever you go...

#### The perfect solution for businesses looking for the most flexible email system without the complexity

Agility Mail is a hosted solution using the powerful technology found in products like Microsoft Exchange. It is easy to use, makes keeping track of your e-mail in and out of the office simple making it easier to keep in touch.

What's more your e-mail is backed up and you won't need to invest in expensive server systems or deal with security and expansion issues either. It's all part of the service.

#### What does it do for you?

- ✔ Flexible – perfect if you travel, change desks or work remotely via laptop, tablet or mobile phone
- ✔ Scalable – add or change accounts with ease
- ✔ Affordable – as it is a hosted solution, there is no need to make expensive investment in servers or backups
- ✔ Worry-Free – we look after everything, so your email just works whenever you need it
- ✔ User-Friendly – Agility Mail works with Outlook, the most popular business email package available
- ✔ Safe – all of your email is backed up across our data centre facilities just in case it goes wrong
- ✔ Smart – there are loads of ways to use the Agility Mail service and lots of options to make it work for you

#### What do customers say?

“ I have a PC, a laptop and two email accounts. Agility Mail was recommended as this would enable me to have both accounts on each computer, updated in real time. Plus, I've the facility to log on to both accounts via Agility webmail, home or abroad.

The set-up works extremely well - I've had good support from the team if there's been a problem, and as I'm not particularly computer literate, they have treated my questions with patience, politeness and efficiency. It's been good value for money – if you have a set-up anything like mine I would recommend Agility Mail
